

EXAMPLE OF STUDY TOUR TO FINLAND BY VISITEDUFINN

STUDY TOUR THEME:

*Introduction to the key features
of the Finnish Education System*

STUDY TOUR TO FINLAND

OBJECTIVE AND FOCUS

The purpose of this study tour is to share and learn together with Finnish educators about the Finnish education and schooling system, as well as the key aspects that have led Finland to reach globally acknowledged educational success. The main interest is in the daily education practice.

The program consists of preparatory lectures of the Finnish school system, visits to various education centers and schools, and practical pedagogical workshops. During the visits, there is time to talk with Finnish educators, principals, and teachers and ask about their teaching practices, methods, or the challenges they face during their daily work. Finnish educational experts accompany all visits.

Extra emphasis is on reflective pedagogical thinking as a teacher.

It is not only about the education You will learn; Finland, the happiest country of the world, is also one of the best countries to be a mother or a child.

Moreover, Helsinki is one of the most livable and honest cities in the world, also a Creative City of Design.

We have a fragile history and secrets of nature to share with you. Our design and story are not something you can only read about; you need to come and experience it yourself! ...

SO WELCOME TO FINLAND!
